#### Maintenance of Wire Coffee Chair:

Frame: Wipe off surfaces with a damp cloth. Grease stains can be removed with soapy water.

Fabric: Regular cleaning is important in order to keep the upholstery looking its best and prolong its life.

Dust and dirt wears the textile and reduces its re-retardant properties.

Vacuum frequently on medium power, ideally every week.

Remove non-greasy stains by carefully dabbing with a lint-free cloth or sponge wrung out in clean hot water.

Afterwards, if necessary, clean by dabbing with soapy water or water with a little washing detergent added. See formulae.

Finally, dab the surface with clean, tepid water.

Notice!

For indoor use only!
